In-class Assignment: Editable HTML Tables

- Deal with the wild world of online tutorials

- Your goal: find a solution to teach you how to...
  - **Display** data from a MySQL database table in an HTML table
  - **Add** new records to the database table from an HTML form
  - Ability to selectively **delete** records from the database table
  - Ability to **edit/update** existing records in the database table

- Many solutions!
  - Plain HTML and PHP
  - AJAX (Asynchronous JavaScript And XML)
    - AJAX (JavaScript) to dynamically manipulate the HTML table while reading/writing the MySQL database (using PHP) in the background
  - Other solutions to transfer data
    - JSON
    - plain text
    - jQuery, node.js, react.js, many more
